Your University
Stephen F. Austin State University is a regional institution located in Nacogdoches, Texas. The university enrolls nearly 13,000 students, offering 81 undergraduate majors and more than 120 areas of study within six academic colleges – business, education, forestry and agriculture, sciences and mathematics, fine arts, and liberal and applied arts. The university is accredited by the Southern Association of Colleges and Schools.

Your College
The Nelson Rusche College of Business, or Rusche Business, enrolls nearly 2,000 majors in five academic areas:

- Gerald W. Schlief School of Accountancy
- Department of Business Communication and Legal Studies
- Department of Computer Science
- Department of Economics and Finance
- Department of Management, Marketing, and International Business

Your Department
Computers are the key to your training, and the Department of Computer Science is loaded with them. The Rusche College’s McGee Computing Laboratory houses more than 100 personal computers and workstations, and the Information Technology Laboratory holds additional software, hardware and support materials for student use.

Students also benefit from small class sizes (student-to-faculty ratio 22:1), which promote individualized instruction. Three faculty members are qualified evaluators for ABET Inc. and one serves as an ABET commissioner. ABET Inc. is an accrediting agency for engineering and technology programs in the United States and abroad.

Your Degrees
Bachelor of Business Administration
- Computer Information Systems

Bachelor of Arts
- Information Technology

Bachelor of Science
- Computer Science

“The professors are able and willing to help you better understand the information outside of class. They want you to succeed and excel.”
Janet Hill

“Classes are small enough to allow questions and discussions, which enrich the learning experience.”
Shae Martinez

“The department helped shape me into the marketable and valuable professional that I am today. I wouldn’t be where I am if SFA didn’t teach me the key to success.”
Byron Walker

STEPHEN F. AUSTIN STATE UNIVERSITY
NACOGDOCHES, TEXAS
Your Profession
The need for computing professionals is growing exponentially. The Bureau of Labor Statistics expects nearly 1.7 million job openings in computer and information technology during the decade ending 2020. A recent report by the National Association of Colleges and Employers showed graduates with a bachelor’s degree in computer science had average starting salaries of $60,594, second only to engineering.

You’ll find graduates of SFA’s computer science program employed as software engineers, database administrators, network and data communication analysts, computer applications software engineers, and more.

Your Program
Computer science requires good problem-solving and communication skills. Students considering a computer-related degree should start preparing themselves early by taking higher-level courses of English, mathematics and science throughout high school. Emphasis also should be placed on basic computing literacy and computer programming.

The college offers three majors that will provide you with the skills you need to enter the workforce with the appropriate background for your career:

Bachelor of Science in Computer Science: SFA is one of only a few programs in Texas to be accredited by the Computing Accreditation Commission of ABET Inc.

Bachelor of Business Administration in Computer Information Systems: Accredited by the AACSB International — the Association to Advance Collegiate Schools of Business.

Bachelor of Arts in Information Technology: A rapidly growing program established in 2008. SFA is one of only a few universities in the state to offer this program.

Your Advantages
The department provides a host of resources to help you succeed: an outstanding faculty, the Rasche College’s state-of-the-art McGee Computing Laboratory and access to the latest software. In addition, you are encouraged to participate in the following:

- **Computer Science Club:** Brings students of similar interest together and offers a variety of events, including guest speakers, LAN parties, programming contests, picnics and field trips.
- **Upsilon Pi Epsilon:** UPE is the International Honor Society for computing and information disciplines and is open to junior, senior and graduate students.
- **Scholarships:** Several scholarships have been created specifically for students pursuing one of our three majors. Many additional scholarships are offered through the SFA Alumni Association. For more information on scholarships, access sfasu.edu/admissions/scholarships.
- **Internships:** You’ll obtain hands-on experience and also have the opportunity to earn course credit hours while interning.
