STANDARD POLICY

POLICY

Students will receive formative clinical evaluations throughout the semester and a written summative evaluation of clinical performance at the end of each semester.

PROCEDURE

The formative clinical performance evaluations completed throughout the semester may be verbal and/or written at the discretion of the course instructor.

Each student will receive a written clinical evaluation at the completion of each clinical course. This evaluation will be discussed with the student. The student will be asked to sign and date the evaluation before it is filed in his/her permanent record. If, for any reason, the student disagrees with the clinical evaluation, the student will be referred to the SON Student Affairs Committee.

If a student is in danger of failing clinically at the midterm of clinical, they should be notified in writing by their clinical instructor. The student then should be evaluated by a different clinical instructor for the second part of clinical. Final clinical evaluation and grading should include feedback from both instructors.
