Effort Reporting and Certification for Sponsored Activities

Original Implementation: January 29, 2008
Last Revision: January 29, 2019

This policy establishes requirements to facilitate compliance with laws and regulations concerning employee effort for salary expenditures and cost-sharing requirements related to grants, contracts and other sponsored agreements (grants).

Recipients of federal funds must maintain a system of internal controls that provide reasonable assurance that payroll charges are accurate, allowable, necessary, and properly allocated among grant and institutional activities. Recipients of grants must exercise due diligence in the review and certification of effort reports.

Effort expended for extra compensation as defined in the Salary Supplements, Stipends and Additional Compensation policy (12.16), or for work not compensated by the university, is not included in effort calculations. Refer to Compensation from Grants, Contracts and Other Sponsored Agreements (12.1).

1. Effort is defined as the percent of time spent on a particular activity and is not based on a traditional 40-hour work week. The total effort associated with institutional base salary (IBS) is defined as 100% effort. This includes instruction, departmental administration, departmental research, grants, and other institutional activities.

The federal government recognizes that decisions made in the certification of effort percentages to individual sponsored activities are based on reasonable estimates. It is recognized that, in an academic setting, teaching, research, service, and administration are often inextricably intermingled. Therefore, a precise assessment of factors that contribute to costs is not always feasible, nor is it expected. Reliance, therefore, is placed on estimates in which a degree of tolerance is appropriate.

Tolerance is defined by the university as +/- five percent (5%) of the committed effort. Therefore, if the percentage on the effort report reasonably reflects one’s effort within this variance, the effort percentage may be confirmed as a reasonable estimate. Effort certification report adjustments may be required when: a) effort does not match salary expenditures within the tolerance limit for the time period covered by the report; b) there are payroll cost transfers; or c) revised personnel actions are generated.

2. Effort certification reports are required for all employees who devote effort (paid or cost-shared) to one or more grants. These records are generated by and retained in the Banner effort system for salaried individuals. For hourly paid individuals, certified time records are generated and retained in the TimeClock Plus system or recorded manually.
on time sheets retained by the department, and serve as alternate official effort
certification records.

3. After-the-fact effort reporting is required for all sponsored projects grants regardless of the
source of funds (Federal, state, or private). After-the-fact reporting is defined as
certification reports originated after the work has been performed.

4. Project directors (PDs) or principal investigators (PIs) are responsible for ensuring that
effort certification reports are completed accurately and in a timely manner for each
individual subject to this policy from a grant for which they serve as PD/PI.

Effort reports must be certified by a person having either firsthand knowledge of the
work performed or a suitable means of verification that the work performed was related
to the specific sponsored activities. Normally, this certification is performed by the
employee, PD or PI. If one of these persons is unable to certify the effort report, a
surrogate with firsthand knowledge or who has a suitable means of verification as
described above may certify the report (e.g., the unit head, a co-investigator). The
PD/PI will certify effort for graduate students.

5. Effort attributed to any grant must represent work specific to the agreement. Intentional
falsification, forgery, or fraudulent alteration of effort certification reports constitutes
fraud. Non-compliance with this policy and related procedures may result in penalties
levied against the departments, divisions, schools and/or the university. Individuals with
roles and responsibilities in the certification process are held responsible for any instances
of non-compliance. Criminal and/or employee discipline measures may be pursued.

If effort reports are not certified in a timely manner, the Office of Research and Graduate
Studies will take actions to assist with compliance of this federal requirement. These actions
may include, but are not limited to: a) withholding submission of proposals, project
applications or other documents such as material transfer agreements; b) freezing active grant
funds; or c) adjusting uncertified labor distributions and the effort they represent to non-
sponsored Banner funds managed by the administrative unit.

6. Each individual with responsibilities related to effort certification must thoroughly
understand the proper method of reviewing and certifying the effort reports to ensure the
reports reasonably reflect effort expended toward grants and other activities during the report
period. Thus, effort training is mandatory for all employees who certify payroll expenses.

Procedures for effort reporting and certification are outlined in the Grants and Contracts
Procedures Manual published by the Office of Research and Graduate Studies.
