Inventory Management

Add Chemical Containers to your inventory from the left top column

Then type in the chemical name or cas and hit search CAD

Now it either shows up the exact chemical or a list of probable chemicals with both names and CAS numbered

Choose the right chemical and it will take you to the next page

Add Container size

Add content volume of the chemical. If you don't' add, it will default to the container size

Anything marked RED is mandatory

Select lab location and hit submit

WAIT YOU ARE NOT DONE YET

Now carefully choose the storage area.. Never choose "Undefined"

and now enter the barcode number "as it is" (case sensitive"

Hit submit

WAIT YOU ARE NOT DONE YET

Now hit ok that says, Apply barcodes to all containers..

Hollaaaaa. You are done.. Your chemical is in the system.
