“Let’s Say it Together!!!”, or Good Old **Choral Response**

Choral response is a method involving all students in the group responding orally to the teacher’s prompt.

And this is how I do it starting from the very first lecture...

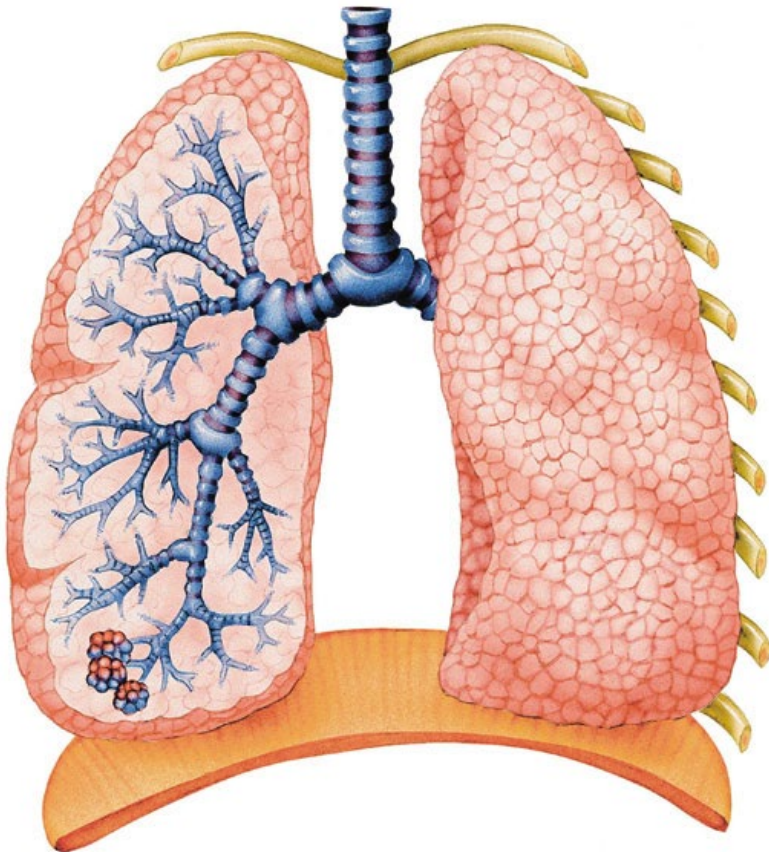

Ms. Minich

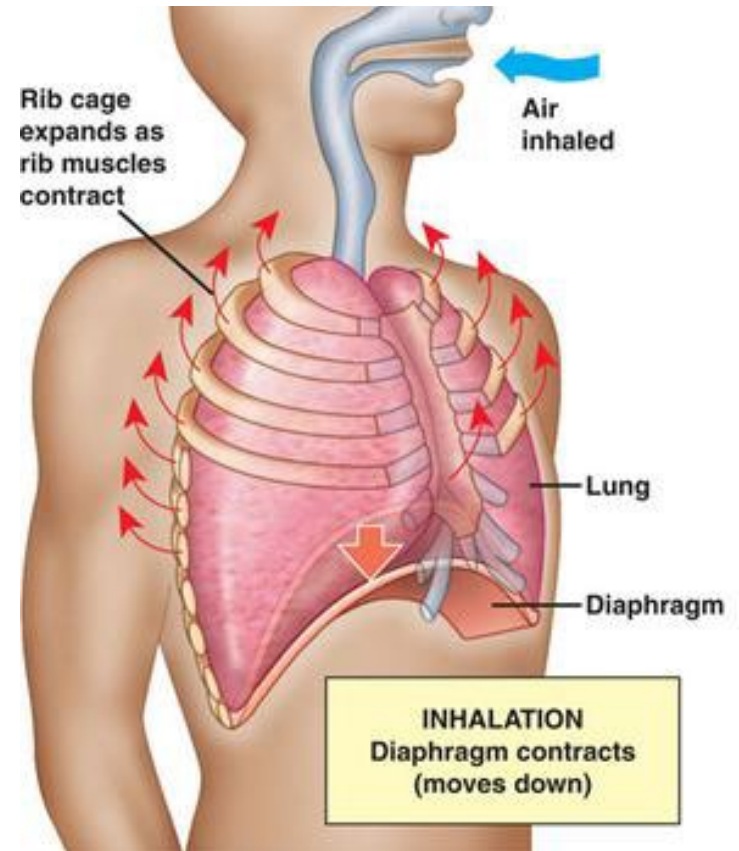

Welcome to the
Human Anatomy and Physiology 1
BIO 238

Anatomy vs. Physiology

Anatomy studies:
the **form, structure**, and **the relationships** among various parts of the body.

Physiology examines:
how various parts of our body **function** under the **normal** and **abnormal** circumstances

Anatomy and **Physiology** Compared

Ex. 1 Examining the organs of the respiratory system _____

Ex. 2 Examining the steps of respiration _____

Ex. 3 Describing the layers of the heart _____

Ex. 4 Investigating the effect of stress on the heart rate _____

“Let’s Say it Together!!!” – Why I like it:

- This **interactive** strategy helps students to **lessen the stress** while giving an answer, as there is safety in numbers.
- This is a great way to **engage majority** of the students in **quick**, efficient interactive **drills**, as well as rapid **assessment** of student comprehension.
