Management's Discussion and Analysis

Unaudited

For the Year Ended August 31, 2014

INTRODUCTION

Stephen F. Austin State University (the University) is a comprehensive regional public institution of higher education and an agency of the State of Texas (State). The University was founded in 1923 and is named for the "Father of Texas," Stephen Fuller Austin. It is located in Nacogdoches in the Piney Woods area of East Texas. The main campus includes more than 400 acres, including part of the original homestead of Thomas J. Rusk, early Texas patriot and United States Senator. In fall 2013, the University enrolled nearly 13,000 students in 34 academic units and 6 colleges. Bachelors, masters, and doctoral level degrees are offered by the University.

The University is accredited by the Southern Association of Colleges and Schools Commission on Colleges. Specific academic programs hold numerous other accreditations.

The University does not include any blended components in the Financial Statements.

OVERVIEW OF THE FINANCIAL STATEMENTS AND FINANCIAL ANALYSIS

The objective of the Management's Discussion and Analysis is to help readers of the Financial Statements of Stephen F. Austin State University better understand the financial position and operating activities for the fiscal year ended August 31, 2014, with selected comparative information for the year ended August 31, 2013. This discussion should be read in conjunction with the Transmittal Letter, Financial Statements and Notes to the Financial Statements. Management has prepared the Financial Statements and Notes to the Financial Statements along with the discussion and analysis. Responsibility for the completeness and fairness of this information rests with the university administration.

Three primary statements are presented: Statement of Net Position; Statement of Revenues, Expenses, and Changes in Net Position; and Statement of Cash Flows. The Financial Statements are prepared in accordance with requirements established by the Texas Comptroller of Public Accounts.

FINANCIAL HIGHLIGHTS

- Enrollment for the 2013 fall semester was 12,772. This figure represents a slight decrease from the all-time high SFA enrollment of 12,999 recorded in fall 2012. University officials attributed the 1.7 percent decrease to various factors, including higher SFA admission standards and graduation of the largest class in school history in May 2013.
- The University's financial position at August 31, 2014, reflected total assets of \$408 million and total liabilities of \$262 million for a total net position of \$146 million.
- The Board of Regents approved the hiring of a marketing firm to handle a re-branding campaign for the university. The campaign is a multi-phase project that includes extensive media buys focusing on the most critical times of the year for the college-decision process and increased focus on the positive perception of the university.
- Construction of the Ina Brundrett Conservation Education Building was completed. The building use is to present environmental education programs to schoolchildren and visitors throughout East Texas.
- In September 2013 the University refunded bonds and extinguished an outstanding bond, reducing outstanding debt by approximately \$5.2 million.

CONDENSED FINANCIAL INFORMATION AND FINANCIAL HIGHLIGHTS

Statement of Net Position

The Statement of Net Position provides a snapshot view of assets available for use in the University's continuing operations and enables readers to determine the amounts owed to others. Over time, increases or decreases in net position are indicators of the improvement or decline of the financial health of the University. The Statement of Net Position presents the assets, liabilities, deferred outflow and inflow of resources, and net position of the University at a specific point in time, in this case August 31, 2014. Net position represents the residual interest in the University's assets after deducting liabilities.

"Net Position" displays three major categories: Invested in Capital Assets, Net of Related Debt; Restricted Net Position; and Unrestricted Net Position. The Invested in Capital Assets, Net of Related Debt category identifies the equity in property, plant, and equipment owned by the University. Restricted Net Position is either expendable or non-expendable. Expendable restricted net position may be expended only for the purposes designated by the external donor or provider of the assets. Non-expendable net position is comprised entirely of funds held as permanent endowments. Unrestricted Net Position is available for any lawful purpose of the University. Although Unrestricted Net Position assets are not subject to externally imposed stipulations, these assets may have other commitments for various future uses in support of the University's mission. These include commitments for encumbrances outstanding at year-end. Also, recognized in Unrestricted Net Position are unspent Higher Education Funds (HEF) appropriations, which have restrictions imposed by the State. Assets and liabilities are generally measured using current values, except capital assets, which are stated at historical cost less an allowance for depreciation.

A summarized comparison of the University's Statement of Net Position at August 31, 2014, and 2013 follows:

For the Year Ended August 31, 2014

In fiscal year 2014, total assets of the University decreased approximately \$1.8 million from the previous fiscal year. Capital assets, net of depreciation, decreased approximately \$12.5 million. Capital expenditures of \$4.5 million offset by depreciation and amortization expenditures of \$16.8 million accounted for this change. Overall, cash and investments increased \$8.5 million from 2013. Receivables recognized in current assets increased approximately \$9.9 million mainly due to the recognition of Federal Direct Loan receivable of \$2.8 million from 2013 to \$10 million in 2014. Prepaid expenses decreased \$8.4 million because of a change in the accounting for federal financial aid including Pell grants received by students for the fall term.

Total liabilities decreased by approximately \$11.2 million primarily as a result of the University paying current obligations of long-term debt associated with capital leases, interagency loans and bonds payable, and due to the refunding of the 2002 tuition revenue bond and the 2004 revenue bond and the early extinguishment of the 2004(A) revenue bond.

Unrestricted Net Position increased by \$5.5 million primarily due to an increase in designated tuition revenues from increased rates and stable enrollment.

Statement of Revenues, Expenses, and Changes in Net Position

Changes in total net position are based on the activity shown on the Statement of Revenues, Expenses, and Changes in Net Position. This statement presents operating revenues and expenses, non-operating revenues and expenses, and other gains and losses.

Operating revenues are receipts for providing goods and services to the various constituencies of the University. Operating expenses include salaries, wages, goods and services needed to carry out the mission of the University. Non-operating revenues are those for which no goods or services were provided. This category includes State appropriations, Pell grants, gifts, investment income and interest payments on long-term debt.

A summarized comparison of the University's Statement of Revenues, Expenses, and Changes in Net Position for the years ended August 31, 2014, and 2013 follows:

For the Year Ended August 31, 2014

Some of the fiscal year 2014 highlights presented in the Statement of Revenues, Expenses, and Changes in Net Position are as follows:

- In April, 2013 the Board of Regents approved an increase in designated tuition rates. Gross tuition increased by \$4.4 million, which was connected to both a stable enrollment and a higher designated tuition rate. The University uses a formula provided by the National Association of College and University Business Officers (NACUBO) to calculate tuition discounts, which takes into account student charges, payments both to and from students, loan proceeds, contractual payments made on a student's behalf, and scholarships.
- Gross auxiliary enterprise revenues – pledged remained relatively stable. Although the Board of Regents approved an increase in room and board rates of 1.5 and 1.0 percent respectively for the 2014 fiscal period, there was a decrease in occupancy of 4 percent.
- Exemptions mandated by the State continued to increase largely due to the Hazelwood Legacy program.

Gross Student Revenues, Exemptions, Discounts and Allowances			
	2014	2013	Net Change

Some of the fiscal year 2014 significant changes from the prior year for operating expenses are:

- Salaries, wages and payroll related costs increased by approximately \$5.9 million. A three percent merit pool approved by the Board of Regents in July 2013 for the 2014 fiscal year attributed to this increase. As indicated in the chart below, salaries, wages and payroll related costs account for more than half of the University's operating budget.
- Communications and utilities decreased by \$1.28 million. This is primarily due to the comprehensive energy management program that utilized capital from a revolving loan fund from the State Energy Conservation Office to upgrade the University's utility systems.
- Other Operating Expenses increased \$1.95 million due in large part to contracted services for the re-branding campaign, athletic activity and costs associated with the flood repair of the Lumberjack Lodge.

Statement of Cash Flows

The purpose of a statement of cash flows is to provide relevant information about the University's cash receipts and payments during the fiscal year. The statement of cash flows, when used with related disclosures and information in the other financial statements, provides relevant information about the University, such as:

- Its ability to generate future net cash flows.
- Its ability to meet obligations when due.
- Its needs for external financing.
- The reason for differences between operating income and associated cash receipts and payments.
- The effects on the University's financial position of its cash and its noncash investing, capital and financing transactions.

The statement of cash flows provides details about the University's major sources and uses of cash during the year. It presents detailed information about the cash activity and an indication of the University's liquidity and ability to meet cash obligations. There are four categories of cash flow activity:

1. Cash Flows from Operating Activities – cash flows from operating activities result from providing services and producing and delivering goods. They include all other transactions not defined as noncapital financing, capital and related financing or investing activities.
2. Cash Flows from Non-Capital Financing Activities – cash flows from noncapital financing activities include borrowing money and repaying the principal and interest on amounts borrowed for purposes other than to acquire, construct or improve capital assets.
3. Cash Flows from Capital and Related Financing Activities – cash flows from capital and related financing activities include acquiring and disposing of capital assets, borrowing money to acquire, construct or improve capital assets and repaying the principal and interest amounts.
4. Cash Flows from Investing Activities – cash flows from investing activities include making and collecting loans (except program loans) and the acquisition and disposition of debt or equity instruments.

A statement of cash flows reports net cash provided or used in each of the four categories of classifying cash transactions. It also reports the net effect of these flows on cash and cash equivalents during the fiscal year in a manner that reconciles beginning and ending cash and cash equivalents for the year.

The final section of the Statement of Cash Flows reconciles the Net Cash Provided (Used) by Operating Activities to the Operating Income (Loss) reflected on the Statement of Revenues, Expenses, and Changes in Net Position. When transactions are part cash and part non-cash, only the cash portion is reported within the statement of cash flows. Non-cash items include information about investing, capital and financing activities that affect assets and liabilities but do not result in cash receipts or cash payments in the fiscal period. The non-cash portion is reported in the non-cash transaction section supplemental to the statement of cash flows.

Management's Discussion and Analysis
UNAUDITED
For the Year Ended August 31, 2014

A summarized comparison of the Statement of Cash Flows at August 31, 2014, and 2013 follows:

	2014	2013
Net Cash Provided (Used) by:		
Operating Activities	\$ (57,024,941.51)	\$ (43,630,553.98)
Non-Capital Financing Activities	76,342,928.85	69,138,506.56
Capital and Related Financing Activities	(16,861,007.76)	(14,446,125.62)
Investing Activities	(7,310,018.72)	17,028,074.12
Increase (Decrease) in Cash and Cash Equivalents	(4,853,039.14)	28,089,901.08
 Cash and Cash Equivalents, Beginning of Year	 89,268,389.92	 61,178,488.84
 Cash and Cash Equivalents, End of Year	 \$ 84,415,350.78	 \$ 89,268,389.92

Net cash provided (used) by operating activities should be viewed together with net cash provided (used) by non-capital financing activities because state appropriations are significant sources of recurring revenue in support of operating expenses, but under GASB Statement No. 35 they must be classified as non-capital financing activities instead of operating activities. Additionally, Pell grants and other federal financial aid revenue are classified as a non-operating activity since this is considered a non-exchange activity.

Cash provided for or used by operating activities decreased \$13.4 million. This change was due to a \$10 million increase in federal grant receivables related to the timing of drawdowns of federal financial aid.

Cash flows from non-capital financing activities in fiscal year 2014 increased ten percent, or \$7.2 million, from the prior year. State appropriations of \$5.9 million accounted for most of this variance due to both an increase in state appropriations and the timing of the drawdowns from the state.

Net cash used for capital and related financing activities decreased by \$2.4 million. This variance was due to the payments of debt, which was a \$3.8 million increase over the previous year and primarily due to the early extinguishment of the 2004(A) bond series. An increase of \$1.2 million in sale of capital assets, rental income and capital contributions accounted for the net variance.

The change in net cash provided for investing activities decreased approximately \$23 million. This decrease reflects a change in investment strategy that included shifting funds from short-term certificates of deposit to long-term pooled investments held by Texas A & M University.

CAPITAL ASSET AND DEBT ADMINISTRATION

The University continues to improve its campus through development and renewal of its facilities and other capital assets. Capital additions totaled approximately \$4.5 million in fiscal year 2014, \$4.4 million in fiscal year 2013, \$11.8 million in fiscal year 2012, and \$34.7 million in fiscal year 2011.

As part of the University's capital plan for 2014, new projects include the renovations of the School of Music practice rooms, the boilers in the Forestry and Fine Arts buildings, and upgrades to the power plant. Additionally,

the University is repairing the flood damage at one of its residence halls. These repairs are in excess of \$500 thousand, however the University is being reimbursed from insurance proceeds.

In September 2013, the Board of Regents issued \$22,255,000 in bonds to refund \$23,910,000 in bond liability. This resulted in a net economic gain of \$1,589,977, which is the difference in net present value of the old debt and new debt service payments.

For the 2014-15, the Board of Regents adopted a capital plan of approximately \$4.39 million. Projects include renovation projects across campus, maintenance projects and upgrades to Johnson Coliseum and numerous academic and auxiliary facilities.

ECONOMIC OUTLOOK

Management is not aware of any facts, decisions, or conditions that would have a material effect on the financial position or results of operations during the fiscal year 2015.

Enrollment for fall 2014 increased slightly by .2 percent after increasing admission standards in the fall of 2012. Increasing the admission standards has attracted students that should increase the retention rates of undergraduate students.

In April 2014, the Texas Higher Education Coordinating Board approved a new four-year engineering degree program to begin in the fall term.

The Board of Regents approved an increase in designated tuition and various fees for the 2014-15 academic year. The university also adopted a fixed-rate tuition plan as required by House Bill 29, passed in the last legislative session by the Texas Legislature. Room and board rates were also increased for 2015 3.5 and 1.9 percent, respectively.

In fiscal year 2013, the 83rd Legislature of Texas met and approved an increase in State funding for the university of \$1.3 million per year for 2014-15 over the last biennium.

SIGNIFICANT EVENTS

Management is not aware of any significant events that impacted the financial statements this year.

NOTE 1: Summary of Significant Accounting Policies

Entity

Stephen F. Austin State University (the University) is an agency of the State of Texas (the State). The University's financial records comply with State statutes and regulations. This includes compliance with the Texas Comptroller of Public Accounts' *Reporting Requirements for Annual Financial Reports of State Agencies and Universities*.

The University serves the State as a public institution of higher education.

The University has six related entities. The University has determined no related entity is a reportable component unit of Stephen F. Austin State University.

Due to the statewide requirements embedded in Governmental Accounting Standards Board (GASB) Statement No. 34, *Basic Financial Statements — and Management's Discussion and Analysis — for State and Local Governments* and GASB Statement No. 35, *Basic Financial Statements — and Management's Discussion and Analysis — for Public Colleges and Universities*, the Comptroller of Public Accounts does not require the accompanying annual financial report to comply with all the requirements in these Statements. The financial report will be considered for audit by the State Auditor as part of the audit of the State of Texas *Comprehensive Annual Financial Report*; therefore, an opinion has not been expressed on the financial statements and related information contained in this report.

The University follows the “business-type activities” reporting requirement of GASB Statement No. 34 that provides all the financial statements required for enterprise funds.

Blended Component Units

No component unit has been identified which should be reported as a blended unit.

Discretely Presented Component Units

No component unit has been identified which should be discretely presented.

Fund Structure

Basis of Accounting – Proprietary Fund Accounting

Proprietary fund reporting focuses on the determination of operating income, changes in net position, financial positions, and cash flows. The financial statements of the University have been prepared on the accrual basis. Accrual accounting attempts to record a transaction's financial effects in the period in which the transaction occurred, rather than when funds are received or paid. Revenues are recorded when they are earned or when the University has a right to receive the revenues. Expenses are recognized when incurred. The date related cash was received or paid is of no consequence.

Four essential elements of accrual accounting:

- Deferral of expenditures and the subsequent amortization of the deferred costs.
- Deferral of revenues until they are earned.
- Capitalization of certain expenses and the subsequent depreciation of the capitalized costs.
- The accruals of revenues that have been earned and expenses that have been incurred.

Proprietary funds use the flow of economic resources measurement focus, which is similar to the focus used by commercial entities. Proprietary funds focus on whether the enterprise is economically better off as a result of the events and transactions that occurred during the fiscal period reported. Transactions and events that improved an enterprise's financial position are reported as revenues or gains. Transactions and events that diminished the economic position of the enterprise are reported as expenses or losses. Both current and long-term assets and liabilities are presented on the Statement of Net Position.

The Statement of Revenues, Expenses, and Changes in Net Position is segregated into operating and non-operating sections.

Notes to the Financial Statements
August 31, 2014

Generally, operating activities are those that directly result from the provision of goods and services to customers or are directly related to the principal and usual activity of a fund. GASB Statement No. 34 indicates that a consideration for defining a proprietary fund's operating revenues and expenditures is how individual transactions would be classified for purposes of preparing a Statement of Cash Flows according to GASB Statement No. 9, *Reporting Cash Flows of Proprietary and Nonexpendable Trust Funds and Governmental Entities That Use Proprietary Fund Accounting*.

Since certain grants are actually contracts for services, they are classified as operating activities. State appropriations and certain grants, such as the Pell grants, are reported as non-operating activities even though they are directly related to the principal and usual activity of the University. These are considered non-exchange transactions and are therefore considered non-operating revenues.

Budget and Budgetary Accounting

The University prepares an annual budget which represents anticipated sources of revenue and authorized uses. This budget is approved by the University's Board of Regents. Unencumbered appropriations are generally subject to lapse 60 days after the end of the fiscal year for which they were appropriated. Budget information is not included in the Annual Financial Report.

Assets, Liabilities, and Net Position

Assets

Assets are reported separately as either current or noncurrent in the Statement of Net Position.

Cash and Cash Equivalents

Short-term highly liquid investments with an original maturity of three months or less are considered cash equivalents.

Restricted Assets

Restricted assets include monies or other resources restricted by legal or contractual requirements. These assets include proceeds of proprietary fund general obligation and revenue bonds and revenues set aside for statutory or contractual requirements.

Inventories

Inventories include both merchandise inventories on hand for sale and consumable inventories. Inventories are valued using the average cost method. The consumption method of accounting is used to account for inventories and prepaid items. The cost of these items is expensed when the items are sold or consumed.

Prepaid Items

Prepaid items include prepaid expenses attributable to a subsequent fiscal year, including scholarships attributed to the 2014 fall semester. The cost of these items is expensed when the items are used or consumed.

Capital Assets

Equipment with an initial, individual cost of \$5,000 or more and an estimated useful life in excess of one year are capitalized. Other categories of capital assets have capitalization thresholds that are set by the state. These assets are capitalized and reported at cost or, if not purchased, at appraised fair value on the date of acquisition. Donated assets are reported at fair value on the acquisition date. Depreciation is reported on all "exhaustible" assets. "Inexhaustible" assets, such as works of art and historical treasures, are not depreciated. Assets are depreciated over the estimated useful life of the asset using the straight-line method of depreciation.

Other Receivables - Current and Noncurrent

Current receivables are specified in the Statement of Net Position. They include amounts that are reasonably expected to be received in fiscal year 2015. Noncurrent receivables are those receivables that are not expected to be collected within one year. Included in this category are student accounts receivable and loan receivables that are not expected to be received during fiscal year 2015. The disaggregation of

other receivables as reported in the financial statements is shown in Note 24, "Disaggregation of Receivable and Payable Balances."

Liabilities

Liabilities are reported separately as either current or noncurrent in the Statement of Net Position.

Accounts Payable

Accounts Payable represents the liability for the value of assets or services received at the balance sheet date for which payment is pending.

Other Payables – Current and Noncurrent

The disaggregation of other payables as reported in the financial statements is shown in Note 24, "Disaggregation of Receivable and Payable Balances."

Employees' Compensable Leave

Employees' Compensable Leave represent the liability that becomes "due" upon the occurrence of relevant events such as resignations, retirements, and uses of leave balances by covered employees. Liabilities are reported separately as either current or noncurrent in the Statement of Net Position. These obligations are normally paid from the same funding source from which the covered employee's salary or wage compensation was paid.

Capital Lease Obligations

Capital Lease Obligations represent the liability for future lease payments under capital lease contracts. Liabilities are reported separately in the Statement of Net Position as either current, for the amounts due within one year, or noncurrent, for the amounts due thereafter.

Bonds Payable - Revenue Bonds

The principal of revenue bonds is reported separately in the Statement of Net Position as either current, for the amounts due within one year, or noncurrent, for the amounts due thereafter. Bonds payable are recorded at par value, net of unamortized premiums, discounts, issuance costs and gains/(losses) on bond refunding activities. Interest expense is reported on the accrual basis.

Bonds Payable - Tuition Revenue Bonds

The principal of tuition revenue bonds is reported separately in the Statement of Net Position as either current, for the amounts due within one year, or noncurrent, for the amounts due thereafter. Bonds payable are recorded at par value, net of unamortized premiums, discounts, issuance costs and gains/(losses) on bond refunding activities. Interest expense is reported on the accrual basis.

Bonds Payable - General Obligation Bonds

The principal of general obligation bonds is reported separately in the Statement of Net Position as either current, for the amounts due within one year, or noncurrent, for the amounts due thereafter. Bonds payable are recorded at par, net of unamortized premiums, discounts, issuance costs and gains/(losses) on bond refunding activities. Interest expense is reported on the accrual basis.

Net Position

The difference between assets plus deferred outflows of resources and liabilities plus deferred inflows of resources is "Net Position" on the Statement of Net Position.

Net Position, Invested in Capital Assets, Net of Related Debt

This component of net position is the difference between assets, deferred outflows, deferred inflows and liabilities of proprietary funds that consists of capital assets less:

- Accumulated depreciation
- Accumulated amortization
- Outstanding balances of debt directly attributable to the acquisition, construction, or improvement of those assets

Stephen F. Austin State University-755
UNAUDITED
Notes to the Financial Statements
August 31, 2014

- Deferred outflows and deferred inflows of resources attributable to the acquisition, construction or improvement of those assets or related debt.

The portion of debt or deferred inflows of resources attributable to the unspent amount of related debt proceeds or deferred inflows of resources at the end of the fiscal year is included in the same net position component (restricted or unrestricted) as the unspent amount.

Restricted Net Position

This component of net position is the difference between assets, deferred outflows, deferred inflows and liabilities of proprietary funds that consists of assets with constraints placed on their use by either:

- Externally imposed by creditors, grantors, contributors or laws/regulations of other governments, or
- Imposed by law through enabling legislation or constitutional provisions.

Unrestricted Net Position

This component of net position is the difference between the assets, deferred outflows, deferred inflows and liabilities of proprietary funds not reported as net position, invested in capital assets, net of related debt or restricted net position.

The amortized balance of accretion on capital appreciation bonds is included as part of unrestricted net position unless a sinking fund was established, in which case the balance is reported as part of the restricted net position balance.

Interfund Activities and Transactions

The University has the following types of transactions among State appropriated funds and other State agencies:

- **Transfers** – Legally required transfers that are reported when incurred as “Transfers In” by the recipient fund or State agency and as “Transfers Out” by the disbursing fund or State agency.
- **Reimbursements** – Reimbursements are repayments from funds responsible for expenditures or expenses to funds that made the actual payment. Reimbursements of expenditures made by one State agency for another are recorded as expenditures by the reimbursing State agency and as a reduction of expenditures by the reimbursed State agency. Reimbursements are not displayed in the financial statements.
- **Interfund Receivables and Payables** – Most receivables and payables from or to other state agencies are recorded as “Due from Other Agencies” or “Due to Other Agencies” on the Statement of Net Position. The amounts associated with the State Energy Conservation Office revolving loan program are recorded as “Interfund Payable” on the Statement of Net Position. Repayments associated with the loan program due during the current year are classified as "Current"; repayments due thereafter are classified as "Noncurrent."
- **Interfund Sales and Purchases** – Charges or collections for services rendered by one fund to another that are recorded as revenues of the recipient fund (interfund services provided) and expenditures or expenses of the disbursing fund (interfund services used).

The composition of the University's interfund activities and balances are presented in Note 12.

These amounts consist of all cash in local banks and a portion of short-term investments. These amounts are included on the Statement of Net Position as part of the "Cash and Cash Equivalents" accounts, except for the certificates of deposit, which are recorded as Investments.

As of August 31, 2014, the total bank balance was as follows:

Business-Type Activities	\$ 84,832,758.56	Fiduciary Funds	\$0.00
--------------------------	------------------	-----------------	--------

Custodial credit risk for deposits is the risk that, in the event of the failure of a depository financial institution, the university will not be able to recover deposits or will not be able to recover collateral securities that are in the possession of an outside party. The Stephen F. Austin State University Board Policy 3.21, *Investments*, states that all deposits shall be secured by a pledge of collateral with a market value equal to no less than 100 percent of the deposits plus accrued interest less any amount insured by the FDIC and pursuant to Chapter 2257, the Public Funds Collateral Act.

At August 31, 2014, amounts insured by the FDIC were \$1,499,919.14. There were no violations of legal provisions during the fiscal year. The bank balances at August 31, 2014 that were exposed to custodial credit risks were as follows:

Fund Type	GAAP Fund	Uninsured and uncollateralized	Uninsured and collateralized with securities held by the pledging financial institution	Uninsured and collateralized with securities held by the pledging financial institution's trust department or agent but not in the University's name

Foreign currency risk for investments is the risk that changes in exchange rates will adversely affect the investment. In order to mitigate this risk, Stephen F. Austin State University Board Policy 3.20, *Investments-Endowment Funds*, limits foreign equity investments to a maximum of 30% of the equity portfolio. The exposure to foreign currency risk as of August 31, 2014 was:

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations to the holder of the investment. This is measured by the assignment of a rating by a nationally recognized statistical rating organization. Stephen F. Austin State University Board Policy 3.21, *Investments*, addresses credit risks by authorizing investments only in certain types of securities.

As of August 31, 2014, the Standard & Poor's credit quality ratings of the University's investments by type of securities with credit risk exposure were as follows:

Concentration of credit risk is the risk of loss attributable to the magnitude of investment in a single issuer. As of August 31, 2014, the University's concentration of credit risk is immaterial to any single issuer.

Reverse Repurchase Agreements

The University, by statute, is authorized to enter into reverse repurchase agreements. A reverse repurchase agreement is a transaction in which a broker-dealer or financial institution transfers cash to the University and the University transfers securities to the broker-dealer and promises to repay the cash plus interest in exchange for the same or similar securities. Credit risk exposure for the University arises when a broker-dealer does not return the securities or their value at the conclusion of the reverse repurchase agreement. As of August 31, 2014, the University was not participating in reverse repurchase agreements.

Securities Lending

In securities lending transactions, the University would transfer its securities to broker-dealers and other entities for collateral – which may be cash or securities – and simultaneously agrees to return the collateral for cash or the same securities in the future. The University invests the cash received as collateral and, if the returns on those investments exceed the “rebate” paid to the borrowers of the securities, the securities lending transactions generate income for the University. The University did not participate in securities lending transactions during fiscal year 2014.

NOTE 4: Short-Term Debt

The University had no short-term debt as of August 31, 2014.

NOTE 5: Long-Term Liabilities

Notes and Loans Payable

The University had no unpaid notes or loans payable as of August 31, 2014.

Claims and Judgments

The University had no unpaid settlements or judgments as of August 31, 2014.

Employees' Compensable Leave

A State employee is entitled to be paid for all unused vacation time (annual leave) accrued in the event of the employee's resignation, dismissal, or separation from State employment, provided the employee has had continuous employment with the State for at least six months. Employees subject to the Fair Labor Standards Act (FLSA) are entitled to be paid for all unused compensatory time in the event of the employee's resignation, dismissal, or separation from State employment. The University reports both an expense and a liability for the unpaid annual leave in the Statement of Net Position as the benefits accrue. No liability is recorded for sick pay benefits.

- Current refunding of the bonds reduced Stephen F. Austin State University’s debt service payments over ten years by approximately \$1,867,139.00.
- Economic gain was \$1,589,977.00, the difference between the net present value of the old and new debt service payments.
- Current refunding resulted in the removal of \$23,910,000.00 of bond liability from the balance sheet and the addition of \$22,255,000.00 of bond liability, the net of which is an accounting gain of \$1,655,000.00.
- Premium of \$1,874,175.15 is amortized using the straight –line method over the outstanding term of the bonds.

NOTE 7: Derivative Instruments

The University invests funds in the Texas A & M University System’s investment pool, which includes investment derivatives in the form of forward currency exchange contracts used for the purchase or sale of a specific foreign currency at a fixed quantity and price on a future date as a hedge against either specific transactions or portfolio positions. Additional information on these contracts can be found in the Texas A & M System’s financial statement note disclosures.

The table below summarizes the University’s share of the pending foreign exchange contracts as of August 31, 2014.

Foreign Exchange Contracts Currency	Sell	Buy	Unrealized Gain on Foreign Exchange Contract	Unrealized Loss on Foreign Exchange Contract

Present Value of Net Minimum Lease Payments			\$103,818.70

NOTE 9: Pension Plans

The State of Texas has joint contributory retirement plans for all of its benefits-eligible employees. One of the primary plans in which the University participates is administered by the Teacher Retirement System of Texas (TRS). The contributory percentages of participant salaries currently provided by the State and by each participant are 6.4% and 6.8%, respectively, of annual compensation. TRS does not separately account for each of its component government agencies since TRS itself bears sole responsibility for retirement commitments beyond contributions fixed by the State Legislature. Further information regarding actuarial assumptions and conclusions, together with audited financial statements, are included in TRS' annual financial report.

The State has also established an Optional Retirement Program (ORP) for institutions of higher education for certain administrative personnel and faculty. Participation in ORP is in lieu of participation in TRS, and the selection to participate in ORP must be made in the first 90 days of eligibility. The ORP allows participants to select from a variety of companies for the purchase of annuity contracts or to invest in mutual funds. The contributory percentages on salaries for participants entering the program prior to September 1, 1995, are 8.5% and 6.65% by the State and each participant, respectively. The State's contribution is comprised of 6.6% from the ORP appropriation and 1.9% from other funding sources. The 6.6% contribution is mandatory with the other 1.9% being at the discretion of the University's Board of Regents. The Board has approved the additional contributions for these employees. The contributory percentages on salaries for participants entering the program after August 31, 1995, are 6.6% and 6.65% by the State and each participant, respectively. Since these are individual annuity contracts or mutual fund investments, the University has no additional or unfunded liability for this program.

GASB Statement No. 27, *Accounting for Pensions by State and Local Governmental Employers*, paragraph 27(d) requires universities that administer the ORP to disclose the amounts contributed by members and by the employer for that plan. Following are the ORP contributions made for the 2014 fiscal year:

	Year Ended Aug. 31, 2014
Member Contributions	\$ 1,984,322.60
Employer Contributions	2,135,164.02
Total	\$ 4,119,486.62

NOTE 10: Deferred Compensation

University employees may elect to defer a portion of their earnings for income tax and investment purposes pursuant to authority granted in the TEX. GOV'T. CODE ANN., Chapter 609. Two plans are available for employees: the 403(b) Tax Sheltered Annuity (TSA) plan and the TexaSaver 457(b) plan. The TSA is administered by Stephen F. Austin State University. The 457(b) plan is administered by the Employees Retirement System of Texas. The assets of these plans do not belong to the University or to the State, and thus they have no liability related to the plans.

NOTE 11: Post-employment Health Care and Life Insurance Benefits - (Not Applicable)

NOTE 12: Interfund Activity and Transactions

The University experienced routine transfers with other State agencies that were consistent with the activities of the fund making the transfer. Repayment of interfund balances will occur within one year from the date of the financial statement.

Description of the Case

The plaintiffs are suing for personal injuries causing bodily impairment, loss of earnings, and a loss of earning capacity in the future, arising from an automobile accident involving an SFA employee.

USOR Site PRP Group	SFASU	CERCLA	Past and future response costs	Reasonably Possible*	Unknown
------------------------	-------	--------	-----------------------------------	-------------------------	---------

Description of the Case

The plaintiff is suing under CERCLA for recovery of past and future response costs incurred for environmental clean-up efforts at a site in Pasadena, TX where the university is alleged to have deposited hazardous waste.

* Reasonably Possible indicates the event is more than remote, but less than likely.

* Probable indicates the event is likely to occur.

Federal Assistance

The University receives federal financial assistance for specific purposes that are subject to review or audit by the federal grantor agencies. Entitlement to this assistance is generally conditional upon compliance with the terms and conditions of grant agreements and applicable federal regulations, including the expenditure of assistance for allowable purposes. Such audits could lead to requests for reimbursements to grantor agencies for expenditures disallowed under the terms of the grant. Based on prior experience, management believes such disallowance, if any, will be immaterial.

Arbitrage

Rebatable arbitrage is defined by Internal Revenue Code, Section 148, as earnings on investments purchased with the gross proceeds of a bond issue in excess of the amount that would have been earned if the investment were invested at a yield equal to the yield on the bond issue. The rebatable arbitrage must be paid to the federal government.

The University monitors its investments to restrict earnings to a yield less than the bond issue and, therefore, limits any arbitrage liability. The University estimates that rebatable arbitrage liability, if any, will be immaterial to its overall financial condition.

NOTE 16: Subsequent Events

The University's Board of Regents approved the third phase of the energy savings performance contract with Siemens Industry, Inc. to be financed by a municipal tax exempt lease with a budget of \$11,311,450.00. Under the terms of the contract, the energy savings from the project will be sufficient to pay the annual debt service on the contract. The financing is expected to be finalized in December 2014 and the project is expected to start in January 2015.

NOTE 17: Risk Management

The University is exposed to various risks of loss related to torts; theft of, damage to, and destruction of assets; injuries to employees; losses resulting from providing health and other medical benefits to employees; and natural disasters. It is the University's policy to periodically assess the proper combination of commercial insurance and retention of risk to cover losses to which it may be exposed. The methods the University uses to handle each of these risks are summarized below.

Injuries to Employees: Employees of the University are covered by a workers' compensation insurance policy provided by the State Office of Risk Management (SORM). SORM assesses the University an amount for the insurance coverage in accordance with 28 T.A.C. 251.507. An Interagency Contract in the amount of \$88,025.45 was executed on behalf of the University for Worker's Compensation Insurance during the year ended August 31, 2014. A mid-year assessment adjustment in the amount of \$37,091.90 for 2014 was paid in May 2014 and recorded as an increase in current year expenditures.

Provision for Health and Other Medical Benefits: Employees of the University are eligible for health insurance and optional coverage(s) if they are employed at least 50% time. The coverage is provided through the State, under the Texas Employees Group Benefits Program (GBP), which was administered by administered by Health Select. Eligible employees may select health, dental, life, accidental death and dismemberment, dependent life, and long and short-term disability coverage. All risks associated with these benefits are passed to the GBP. The costs of health insurance coverage are jointly paid by the State and the University as follows: 100% for full-time employees and 50% for their dependents; 50% for part-time employees and 25% for their dependents. Employees hired on or after September 1, 2003, have a 90-day waiting period to participate in health insurance coverage. Contributions made by the State on behalf of the University for health and other medical benefits were \$7,670,757.00 for the year ended August 31, 2014.

Damage to Property: The University is required by certain bond covenants to carry fire and extended coverage and boiler insurance on buildings financed through the issuance of bonds. The insurance protects the bondholders from a disruption to the revenue stream that is being utilized to make the bond interest and principal payments. In fiscal year 2014, there were no damage claims.

The Texas Motor Vehicle Safety Responsibility Act requires that every non-governmental vehicle operated on a State highway be insured for minimum limits of liability in the amount of \$30,000 per injured person, up to a total of \$60,000 for everyone injured in an accident (bodily injury) and \$25,000 for property damage. However, through the SORM Auto Insurance Program the University has chosen to carry liability insurance on its licensed vehicles in the amount of \$250,000/\$500,000/ \$100,000. The University also carries physical damage for vehicles eight years and newer. The annual premium was \$64,530.00 with a deductible paid of \$4,651.38.

Torts and Other Risks: The University is exposed to a variety of civil claims resulting from the performance of its duties. The University has purchased commercial insurance to address this risk.

NOTE 18: Management’s Discussion and Analysis (MD&A)

See *Management’s Discussion and Analysis* at the beginning of this financial report.

NOTE 19: The Financial Reporting Entity

The University is an agency of the State of Texas. The ten members of its Board of Regents are appointed by the Governor, and include one non-voting student Regent. The University has no component units or joint ventures.

NOTE 20: Stewardship, Compliance and Accountability

The University changed its method of recognizing revenue for federal financial aid in 2014. Previously, all revenues and expenses associated with the subsequent fall semester were recognized as deferred revenues and prepaid expenses, since the revenue and expenses are associated with the fall semester, which falls predominantly in the subsequent fiscal year. However, GASB guidelines instruct universities to treat all federal financial aid as a “non-exchange” activity, and as such, stipulate that these revenues and expenses be recognized as non-operating revenues and recorded when the aid is applied to the students’ accounts. Since this aid was applied to the students accounts in August 2014, it is being recognized as income and expense this year. Additionally, since in 2013, the financial aid applied in August 2013, that aid is not recognized in this fiscal year. This change impacts the Statement of Net Position by reducing prepaid expenses and increasing federal receivables, but it does not have an impact on the Statement of Revenues, Expenses and Changes in Net Position, since the revenues recognized are offset by the scholarship expenses.

Additionally, the University is undergoing an internal review of benefit proportionality as requested by the Governor’s Office. The results of the review are undetermined at this time.

NOTE 21: Not Applicable

NOTE 22: Donor Restricted Endowments

The net appreciation (cumulative and unexpended) on donor-restricted endowments presented below is available for authorization and expenditure by the University. The University’s spending policy provides for a target distribution rate between 4% and 5% annually. If returns permit, an amount equal to the rate of inflation will be added back to each endowment principal balance. Additionally, if there are any returns beyond the inflation rate, then this amount may be added to a contingency reserve for distribution during years of poor investment performance. In 2014, account managers were given the option to replenish principal balances in order to offset prior year losses rather than make distributions, subject to the endowment agreements. Accordingly, 3.18% of total earnings was distributed to spending accounts and 7.66% was added back to the balance of endowment accounts. The total income for True Endowments was \$1,116,279.85, of which \$328,248.56 was distributed to the spending accounts. The total income for Term Endowments was \$2,720.31 of which \$399.74 was distributed to the spending accounts. In fiscal year 2014, \$386,103.30 was added to the contingency reserve account.

Donor Restricted Endowments	Amounts of Cumulative Net Appreciation *	Reported in Net Position
True Endowments	\$ 4,455,512.84	Restricted for Expendable
Term Endowments	4,790.70	Restricted for Expendable
Total	\$ 4,460,303.54	Restricted for Expendable

*The current year amount of net appreciation was \$1,174,134.59 for true endowments, and \$2,320.57 for term endowments.
