

Environmental Management

Purpose

The purpose of this policy is to aid in protecting the environment and promote environmental stewardship among Stephen F. Austin State University's (SFASU) faculty, staff, students, contractors, vendors, volunteers, and visitors. To achieve this purpose the Environmental Health, Safety, and Risk Management (EHSRM) department is committed to continuous environmental improvement and protection through a variety of training and inspection programs.

Persons Affected

This policy aids in protecting the environment and promoting stewardship among SFASU faculty, staff, students, contractors, vendors, volunteers, and visitors.

Definitions

Environmental Management System: a framework for environmental management and the implementation of environmental policies and procedures.

Policy

The EHSRM department has primary responsibility for promulgating environmental health, safety, and risk management policies and procedures, to ensure that the university complies with University of Texas System policies, federal, state, and local guidelines, as well as best management practices related to environmental compliance and protection. Program safety manuals and detailed safety procedures are available on the EHSRM website.

SFASU is committed to the protection and enhancement of the environment, while continually seeking new ways to minimize the environmental impact of our past, present, and future activities. As a result of this continuous effort, an environmental management system (EMS) has been created to serve as a planned, documented, systematic, and comprehensive program for managing environmental compliance at SFASU. Detailed information on the EMS can be found on the EHSRM website.

Goals

Stephen F. Austin State University shall:

- A. Ensure compliance with applicable University of Texas System policies, federal, state, and local environmental legislation, regulations, and best management practices.
- B. Prevent pollution by managing and reducing: water and energy consumption, air emissions, discharges to water, and contamination of soil and/or groundwater.
- C. Facilitate employee and student awareness of environmental issues through education and training for further protection of the surrounding environment.
- D. Promote and facilitate the reduction, reuse, and recycling of waste.

- E. Consider the impact on the environment when designing new projects and procedures or changing existing practices.

Responsibilities

It is imperative that Stephen F. Austin State University employees comply with University of Texas System policies, federal, state, and local environmental health, safety, risk management legislation, and relevant environmental compliance and protection codes. In addition, it is essential that employees observe industry best practices and comply with SFASU safety policies, programs, and procedures. Noncompliance may result in disciplinary action.

The director of EHSRM (or designee) has primary responsibility for administration of and compliance with the university's EMS. Duties of the EHSRM department include:

- A. Ensure the most current legal environmental requirements are identified and evaluated for compliance.
- B. Establish, coordinate, and adhere to the environmental management programs outlined in the university's EMS, to comply with regulatory requirements or upon request of department supervisors.
- C. Provide training focused on protecting the environment and ensuring environmental compliance.
- D. Inspect university buildings and property for environmental compliance and protection, or in response to a notice of a possible violation. In carrying out this duty the EHSRM director or representative shall have the authority to enter any university building, structure, room, office, or laboratory without prior notice to department supervisors and staff.
- E. Serve as the official university contact for federal, state, and local environmental regulatory agencies regarding environmental compliance and communicate compliance requirements to university officials. These include, but are not limited to: the U.S. Environmental Protection Agency (EPA), Texas Commission on Environmental Quality (TCEQ), Texas Department of State Health Services (TDSHS), and the city of Nacogdoches.

University employees must comply with the following guidelines and responsibilities:

- A. Comply with all permit requirements, regulations, programs, and procedures specified by the EHSRM department and described in the university's EMS.
- B. Attend environmental training courses and use required protective equipment provided by departments.
- C. Handle all hazardous waste in accordance with the SFASU hazardous waste and universal waste manuals. Each department is responsible for the payment of fees associated with the disposal of their hazardous and/or regulated waste.
- D. Report environmental noncompliance issues or concerns through administrative channels or to the director of EHSRM.

Contractors must comply with the following:

- A. Comply with all permit requirements, regulations, programs, and procedures specified by the EHSRM department and described in the university's EMS.

- B. Report environmental noncompliance issues or concerns through administrative channels or to the director of EHSRM.
- C. Handle all hazardous waste in accordance with the SFASU hazardous waste and universal waste manuals.
- D. Protect the SFASU community from injury and property from damage for their work areas
