Evaluation of Clinical Agency Policy 1.15

Original Implementation: September 8, 1993
Last Revision: April 2022

To facilitate the effective evaluation of clinical educational experiences in meeting clinical objectives and ensure a positive teaching-learning environment, each clinical facility will be evaluated at the end of each semester by students and clinical instructors using that facility.

PROCEDURE

1. At the completion of each clinical experience, students will be asked to evaluate the clinical agency in which they practiced.

2. Each clinical instructor will evaluate all clinical agencies used at the end of each semester.

3. Items on the clinical instructor or student evaluation of clinical agency that fall below the benchmark of 70% will require the completion of an Action Plan by the clinical instructor and submitted to the Evaluation and Program Effectiveness Committee.

4. The results of these online evaluations will be reviewed and maintained by the Evaluation Committee.
