To whom it may concern,

The purpose of this letter is to request preceptor assignment for a student in the Nurse Educator track of the Master of Science in Nursing program at Stephen F. Austin State University. The student has expressed interest in completing their clinical practicum at your nursing education unit. To ensure the best placement for our future educators, we ask that the preceptor is assigned by the dean, director, or designated person from the program rather than being chosen by the student. Our goal is that students are placed with the most appropriate preceptor that will help develop them as a novice nurse educator and serve as a positive role model for the profession.

The nursing education practicum course is the last educator course that students take before graduation. They will have already taken pre-requisite education courses, including curriculum design, assessment and evaluation, and teaching and learning before beginning their practicum course. Students must complete a total of 120 clinical hours with a preceptor, including hours in an inpatient clinical setting, to fulfill course requirements. Clinical hours should be completed in the specific designated categories of facilitating and assessing learning in the classroom, facilitating and assessing learning in the clinical setting, and becoming a member of the organization. A detailed breakdown of clinical hour requirements can be provided upon request and will be given to preceptors once assigned.

Students must complete some of their clinical observation hours in the inpatient clinical setting. However, if the primary preceptor does not go to clinical in an inpatient setting, the student may be assigned a secondary preceptor for that portion of the practicum experience. Clinical preceptors (primary or secondary) must have at least three years of experience as a nurse educator and must submit a curriculum vitae.

We are so thankful to have the opportunity to partner with your organization in equipping future nurse educators. We look forward to hearing from you about the preceptor(s) that you feel are the best fit for this student. Please feel free to contact me if you have any questions or concerns.

Respectfully,

The Administration & Graduate Nursing Faculty  
Stephen F. Austin State University DeWitt School of Nursing
**Introduction, Definitions, and Responsibilities**

Stephen F. Austin State University (SFASU) has a Master of Science in Nursing (MSN) degree, with a Nursing Education emphasis, for registered nurses who have a Bachelor of Science in Nursing (BSN) degree. This program provides the students with additional knowledge and skills in teaching and learning, curriculum design, assessment, and evaluation. Online didactic studies are combined with a precepted practicum experience.

**End of Program Student Learning Outcomes (EPSLOs)**

Upon completion of this course and the program, the student is expected to:

1. Synthesize nursing science with knowledge from other disciplines as the basis for the advanced level of nursing practice.
2. Evaluate effective strategies for managing the ethical and legal dilemmas inherent inpatient care, the health care organization, and research.
3. Employ effective communication and collaborative skills in interdisciplinary teams for creating change in health care.
4. Analyze concepts of health promotion and culturally competent care across the lifespan.
5. Assume responsibility for the use of health care information systems and patient care technology to improve patient outcomes.
6. Demonstrate leadership and accountability in the development and implementation of health care policy.
7. Critically appraise existing literature from nursing and other disciplines to determine and implement the best evidence for practice.
8. Advocate for the advanced practice role within the policy related to access and health care communities.
9. Value continuing competence, growth, and development in the profession.

**NLN Core Competencies for Nurse Educators**

1. Facilitate learning
2. Facilitate learner development and socialization
3. Use assessment and evaluation strategies
4. Participate in curriculum design and evaluation of program outcomes
5. Function as a change agent and leader
6. Pursue continuous quality improvement in the nurse educator role
7. Engage in scholarship
8. Function within the educational environment

**Nursing Education Capstone Course Topics:**  
*Weeks 1-6: Advanced Application of Curriculum Design, Teaching, Learning, Assessment, and Evaluation Concepts*

- Facilitating Learning in the Classroom
- Facilitating Learning in the Online Environment
- Facilitating Learning in the Clinical Setting
- Facilitating Learning in Simulation
- Assessment of Students in the Classroom
- Assessment & Evaluation of Student Clinical Performance
Weeks 7-8: Understanding Program Accreditation and Evaluation
- Nursing Program Accreditation Process
- Evaluation of Program Effectiveness

Weeks 9-10: Becoming a Member of the Organization
- Committee Involvement at the Program and University level
- Boyer’s Model of Scholarship

Weeks 11-14: Transition to Practice as a Nurse Educator
- Role Transition to a Nurse Educator
- Legal and Ethical Dilemmas in Nursing Education
- Fostering a Lifelong Commitment to Growth and Development as a Nurse Educator

Week 15: Serving as an Advocate for the Profession
- The Nurse Educator as a Leader and Change Agent

Week 16: Course Wrap-Up
- Course Wrap-Up

Responsibilities Within Clinical Experiences

I. Responsibility of the DeWitt School of Nursing

- The clinical coordinator will initiate an education affiliation agreement between the preceptor organization and the DeWitt School of Nursing (SON). The agreement will be signed by the preceptor’s organization, the clinical facility, and the appropriate representative for the Nurse Educator program.
- The SON will provide the course work that establishes the foundation for educational practice.
- The SON will provide faculty evaluations of the student and assist the student and preceptor, as needed, in accomplishing clinical learning objectives.
- The SON will provide the materials required for evaluation of the student's performance in the preceptor's clinical setting.

II. Responsibility of the Faculty

- Responsible for identifying and evaluating clinical site contracts for all clinical sites.
- Responsible for assuring all documents are completed related to the preceptorship, including the Preceptor resume/CV, Facility Affiliation Agreement, and Preceptor Agreement (see Appendix C).
- Responsible for arranging communication with the preceptor, student, and faculty a minimum of twice during the semester for evaluation purposes.
- Responsible for providing immediate consultation and/or support for the preceptor when needs or problems are reported.
- Responsible for seeking preceptor input regarding the student's performance.
- Responsible for collaborating with the student in completing the Student's Evaluation of preceptor form at the end of the semester (see Appendix F).
- Using clinical objectives for the specific semester, faculty will document the student's progress and specify satisfactory/unsatisfactory completion of clinical competencies.
III. **Responsibility of the Preceptor**

- The Preceptor will provide a setting in which the student will apply educational principles and practice the role of nurse educator.
- The Preceptor will function as a role model for the student, using NLN core competencies as a guide for roles and responsibilities.
- The Preceptor will supervise all practicum activities and sign the student's clinical hour log at each clinical milestone.
- The Preceptor will make contact during the semester with the student and faculty to discuss the student's progress and learning needs.
- The Preceptor will provide input regarding clinical evaluation of the student and will complete the clinical evaluation form at midterm and at the end of the semester for the student(s) he/she is precepting (see Appendix E).
- The Preceptor is expected to notify faculty immediately when unsatisfactory performance of the student is in question.

IV. **Responsibility of the Student**

- The Student is responsible for providing the preceptor with a current copy of the course syllabus and any forms necessary for demonstration of course progress or evaluation.
- The Student is responsible for assisting with obtaining legal and contractual documents (Student Request for Clinical Agreement, Preceptor resume/CV, Preceptor Agreement) prior to the beginning of the clinical experience (see Appendices A & C).
- The Student will establish a mutually agreeable schedule for clinical time with the preceptor. He/she will come to the clinical experience prepared to perform the assigned learning activities.
- The Student will follow the policies and procedures established by SFASU and the SFASU DeWitt School of Nursing.
- The Student will follow the policies and procedures established in the clinical site.
- The Student participates in conferences with the preceptor and faculty to discuss progress, problems, and learning needs.
- The Student will maintain accurate records of clinical time using the clinical log form (see Appendix D).
- The Student will assist faculty in completing the following forms: Student Evaluation of Clinical Site and Student Evaluation of Preceptor (see Appendix F).

V. **Qualifications for Preceptors**

- Must have at least three years of experience as a nurse educator confirmed by a submitted curriculum vitae.
- Authorized to practice as a nurse educator in Texas.
- Current unencumbered Texas license.
- Preceptors will be approved by course faculty on a case-by-case basis.

**General Expectations for MSN Students**

Successful clinical performance is achieved through the student-preceptor-clinical instructor relationship. Each member of this educational team contributes to the student’s learning experience. Students must be actively
involved in arranging, maintaining, and terminating the preceptor-student relationship over the course of the semester. The responsibilities delineated in this guide are consistent with current professional, Texas Board of Nursing, and Texas law requirements.

Students in the MSN nursing education program track are responsible for working with course faculty in selecting a clinical site and preceptor, requesting affiliation agreements, and completing preceptor agreements. The clinical site should provide students with opportunities that allow students to demonstrate satisfactory completion of course objectives and progression in their development as nurse educators.

Students should consult with course faculty regarding the appropriateness of a clinical site. Under no circumstances will students complete the clinical practicum under the guidance of their work supervisors or family members. Students may complete clinical experiences in the institution where they are employed when, and only when, (1.) the selected preceptor does not have input into annual work performance evaluations and (2.) the physical unit where the clinical hours are completed is NOT the unit where the student is employed. Family members of students cannot be selected as preceptors for any course.

**Student Responsibilities for Clinical Laboratory Experiences & Preceptor Selection**

The MSN courses are offered in a structure that promotes the development of specialized knowledge and skill sets with the application of basic principles and skills and moving to the application of complex principles and skills in the delivery of nursing education. Preceptors will be selected based on their qualifications to support student achievement of the course objectives.

Students should review their course objectives before beginning the process of clinical site selection. The clinical site and preceptor should provide learning opportunities that allow students to demonstrate satisfactory completion of the course objectives and progression in their development as nurse educators. After students have a clear understanding of the learning objectives for their course, they should identify potential clinical sites in their area. For questions about the appropriateness of the clinical setting or preceptor, students should contact course faculty.

**Clinical Preceptor Agreement**

Each student should complete required documents essential to establishing the formal preceptor-student-clinical faculty-SFASU relationship. Preceptor agreements establish a relationship for a specific time period. Therefore, students and preceptors must sign a new agreement each semester. The course faculty will assist students in ensuring the appropriate agreements are complete and up to date.

**Castlebranch: Verification of Student Compliance with Immunization, License, & Certifications**

The MSN Coordinator reviews the documentation stored in Castlebranch.com to assure that all information is current. Student’s background check, license, drug screen, CPR, Hep. A, Hep. B, TB, Varicella, TDAP, flu vaccination, and MMR must all be uploaded into the website. If any requirement is not met, students will not be able to attend clinical. Students must verify with clinical faculty that all information is complete in Castlebranch.com (MyCB) before starting clinical. If the license, certifications, or immunizations expire during the course of the semester, students will be asked to stop attending clinical until Castlebranch.com (MyCB) information is up to date.

**Scheduling of Clinical Hours**

Students and preceptors should agree on the days and times that the student will be in the clinical agency before
starting the clinical experience. The clinical schedule must also fit clinical faculty schedules because clinical faculty must be available to students by phone and for site visits and during the student’s clinical hours. Clinical faculty are authorized to be in the educational setting on days the student is scheduled to be in clinical.

**Clinical Dress and Behavior**

Students are representatives of DeWitt School of Nursing and must present themselves as ambassadors of this program. They are expected to be respectful to preceptors, faculty, staff, patients, and their families. Reports of unprofessional behavior will result in the student being counseled and possibly subject to review by the College of Science & Mathematics.

Students should be professionally dressed and wear an ID badge that identifies them as a Registered Nurse and SFASU MSN Graduate Student. These badges should only be worn by the student when the student is in the clinical setting in the student role. Students should clearly identify themselves as an MSN nursing student in an advanced nursing role. Students must use the same name in the clinical setting and on all documents that they are using in the courses. The appropriate use of uniforms or lab coats should be determined through the preceptor/student interview. Students are expected to conform to the dress of the clinical site where the coursework is completed. Preceptors volunteer to help teach MSN students and often agree to do so because they enjoy learning and interacting with students.

**Attendance**

Performance of clinical hours at the negotiated times and days with the preceptor is required. Careful attention to attend clinical on the days which the preceptor can accommodate the student is important. It is the student’s responsibility to monitor the number of hours completed, and plan on completing the required number of hours for the term. The student is responsible for adjusting his/her personal and employment commitments so that the required number of clinical hours can be completed. If the student does not complete the required clinical hours for the term he/she cannot expect the preceptor to continue the relationship after the term has ended. Extension of the clinical period with the preceptor cannot be assumed but is granted only by agreement with the preceptor and SFA SON faculty. Exceptions related to unexpected illness of the student/family and or preceptor should be discussed with course faculty and the parties involved.

When the student cannot attend clinical on a day that it is scheduled, the student must immediately notify the preceptor and clinical faculty. The student should obtain a telephone number and discuss the procedure of notifying the preceptor and faculty for unexpected absences. Failure to notify the preceptor as negotiated, prior to the beginning of the scheduled clinical day, it is unacceptable and may place the student and clinical placement in jeopardy. The student should notify the course faculty as per the course guidelines. The student should then present the faculty with a plan to complete the lost clinical time.

Faculty Responsibilities:

1. Ensure that preceptors meet qualifications in Rule 215.10 or Rule 219.10, as appropriate.
2. Ensure that there are written agreements which delineate the functions and responsibilities of the affiliating agency, clinical preceptor and nursing program.
3. Ensure that clinical experiences using preceptors occur only after the student has received applicable theory and clinical experiences necessary to safely provide care to client within course or curriculum, as appropriate.
4. Orient the student and preceptor to the clinical experience.
5. Provide the preceptor with the mission, core values, organizational framework, and Differentiated Entry Level Competencies for the School of Nursing (DEC) or the National Organization of Nurse Practitioner Faculties Family Nurse Practitioner Competencies or the NLN Nurse Educator Competencies (as applicable); and discuss student expectations, skills performance, student guidelines for performance of procedures, and methods of evaluation.
6. Assure student compliance with standards on immunization, screening, OSHA standards, AHA-Healthcare Provider BLS, and current liability insurance coverage as appropriate.
7. Communicate assignments and other essential information to the agency and preceptor.
8. Meet regularly with the clinical preceptor and the student in order to monitor and evaluate the learning experience.
9. Be readily available, e.g., telephone or email, for consultation when the students are in the clinical area.
10. Receive feedback from the preceptor regarding student performance while maintaining ultimate responsibility for grading.
11. Provide feedback to preceptor regarding performance as preceptor and the clinical learning experience.
12. Provide recognition to the preceptor for participation as a preceptor.
   (Example: adjunct faculty plaque, certificate.)

Preceptor Responsibilities:

1. Orient to role by reviewing the appropriate Preceptor Handbook below. Scan the QR code with the camera on your phone.
2. Maintain ultimate responsibility for the care of clients. For those precepting MSN Nurse Educator students, maintain ultimate responsibility for the care of clients and students.
3. Function as a role model in the clinical setting.
4. Facilitate learning activities for no more than two students at any given time.
5. Orient the student (s) to the clinical agency.
6. Guide, facilitate, supervise, and monitor the student in achieving the clinical objectives and student's performance of skills and other nursing activities to safe
7. Collaborate with faculty to review the progress of the student toward meeting clinical learning objectives.
8. Provide feedback to the student regarding clinical performance.
9. Contact the faculty if any problem with student performance occurs.
10. Discuss with faculty/student arrangements for appropriate coverage for supervision of the student should the preceptor be absent. (Student to obtain additional preceptor agreement.)
11. Give feedback to the faculty regarding clinical experience for student and suggestions for course development.

**Agency Responsibilities:**
1. Retain ultimate responsibility for the care of clients. For those precepting MSN Nurse Educator students, maintain ultimate responsibility for the care of clients and students.
2. Retain responsibility for preceptor's salary, benefits, and liability.
3. Arrange preceptor's work schedules so they are available on student clinical days.
4. Interpret the preceptor program and expectation of students to other personnel who are not directly involved with preceptorship.

**Student Responsibilities:**
1. Maintain open communications with the preceptor and faculty.
2. Maintain accountability for own learning activities.
3. Prepare for each clinical experience as required.
4. Be accountable for own actions while in the clinical setting.
5. Arrange for preceptor's supervision when performing procedures, as appropriate.
6. Contact faculty by telephone or email if faculty assistance is necessary.
7. Adhere to maintaining the confidential nature of all information obtained during clinical experience.

Final Clinical Practicum Preceptor Evaluation

Student Name: ____________________________  Course: _____________________  
Preceptor Signature: ________________________   Date: _______________________  

Please complete the following evaluation of the student’s practicum performance. Please return the form via email to trottyka@sfasu.edu or mail to Katy Trotty, P.O. Box 6156, Nacogdoches, TX, 75962

**Rating Scale:**  
3 = Exemplary - practices independently and accurately  
2 = Proficient - requires minimal assistance from supporting faculty  
1 = Needs Improvement - requires some assistance from supporting faculty  
0 = Unsatisfactory - requires step-by-step assistance from supporting faculty and/or does not benefit from special guidance  
*All ratings must be 2 or above (to justify a grade of Pass in the course).*

Comments:
Appendix F
The survey will be administered online.

The purpose of this tool is to assist the student in providing the course coordinator and clinical faculty with formal feedback.

Directions: Please answer the questions and evaluate the preceptor by using the Likert Scale:

N/A=Non-applicable; Agree; Disagree

My preceptor:
1. Demonstrated the ability to facilitate learning in the classroom.
2. Demonstrated the ability to facilitate learning in the clinical setting.
3. Demonstrated the ability to serve as a member of the profession.
4. Assisted me with setting goals and providing constructive feedback.
5. Demonstrated understanding of and promoted the role of nurse educator.
6. Considered the student’s individual learning needs.
7. Communicated well with peers and students.
8. Encouraged questions.
9. I would recommend this preceptor for future semesters.
10. Comments:
Student/Faculty Evaluation of Clinical Site

The survey will be administered online.

The purpose of this tool is to assist the student in providing the course coordinator and clinical faculty with formal feedback.

Directions: Please answer the questions and evaluate the preceptor by using the Likert Scale: 

N/A=Non-applicable; Agree; Disagree

The clinical site:
1. Offered a variety of learning experiences for classroom, clinical, and simulation experiences.
2. Allowed students to participate in learning opportunities according to their needs.
3. Had support staff who are appropriately helpful to the student and accepting of the student’s role.
4. Implemented a philosophy that aligns with the practicum learning objectives and NLN Core Competencies for Nurse Educators.
5. I would recommend this site for future student placement.
6. Comments:
Appendix G
