Evaluation of Instructors by Students   Policy 3.20
Original Implementation: April 2022
Last Revision:

To ensure a positive teaching-learning environment in the didactic and clinical setting, and to evaluate faculty’s effectiveness as a nursing educator, students will be provided with the opportunity to assess instructors in didactic and clinical courses at the end of each semester.

PROCEDURE

1. Students enrolled in all programs in the DeWitt School of Nursing will be invited to evaluate the course (didactic) instructor(s) in the courses they are enrolled in and the clinical instructor(s) they are assigned to at the end of the semester.

2. Faculty will review the results of course (didactic) instructor and clinical instructor evaluations. Items on these evaluations that fall below the benchmark of 70% will require the completion of an Action Plan by the instructor and submitted to the Director of the DeWitt School of Nursing.
