

## 1. F-Listed Waste

The **F List** addresses wastes from nonspecific sources and is broken down into several subcategories (or *codes*). Five codes that are commonly applicable to laboratory wastes are:

**F001 Code** — Applicable to spent halogenated solvent mixtures for degreasing which contained, before use, a total of ten percent or more (by volume) of one or more of the following halogenated solvents:

Tetrachloroethylene	Trichloroethylene	Carbon tetrachloride
Methylene chloride	1,1,1-trichloroethane	Chlorinated fluorocarbons

**F002 Code** — Applicable to spent halogenated solvent mixtures and blends which contained, before use, a total of ten percent or more (by volume) of one or more of the following halogenated solvents:

Tetrachloroethylene	Methylene chloride	Chlorobenzene
Trichloroethylene	1,1,1-trichloroethane	1,1,2-trichloro-1,2,2-trifluoroethane
Chlorobenzene	1,1,2-trichloro-1,2,2-trifluoroethane	Ortho-dichlorobenzene
1,1,2-trichloroethane	Trichlorofluoromethane	

**F003 Code** — Applicable to spent non-halogenated solvent mixtures and blends which contained, before use, a total of ten percent or more (by volume) of one or more of the following non-halogenated solvents:

Xylene	Acetone	Ethyl ether
Ethyl acetate	Ethyl benzene	Methyl isobutyl ketone
N-butyl alcohol	Cyclohexanone	Methanol

**F004 Code** — Applicable to spent non-halogenated solvent mixtures and blends which contained, before use, a total of ten percent or more (by volume) of one or more of the following non-halogenated solvents:

Cresols and cresylic acid	Nitrobenzene
---------------------------	--------------

**F005 Code** — Applicable to spent non-halogenated solvent mixtures and blends which contained, before use, a total of ten percent or more (by volume) of one or more of the following non-halogenated solvents:

Toluene	Methyl ethyl ketone	Pyridine	2-ethoxyethanol
Carbon disulfide	Isobutanol	Benzene	2-nitropropane
