

Urine Drug Screen Policy 3.17

Original Implementation: September 5, 1993

Last Revision: May 2019

All students accepted into the School of Nursing (SON) shall have a urine drug screen before attending clinical classes to ensure safety of the public and comply with The Joint Commission (TJC) standards.

PROCEDURE:

All new SON students will have a clear urine drug screen documented in the SON before attending clinical classes.

The SON will designate the companies approved to do the urine drug screening. Results from a company other than those designated may be accepted at the discretion of the SON.

The student will pay for the urine drug screen.

If a student has a positive drug screen, the SON will accept a second screen within one week. The student will pay for the second urine drug screen.

If the second drug screen is positive, the student will not be allowed to attend clinical classes.
